ARA

Great design

is when there's nothing left to take away

Ara is a chair of refined performance, comfort and support that redefines our perspective on sustainability.

Ara is the first task chair developed and manufactured in Europe to achieve Cradle to Cradle accreditation. The materials we've chosen make Ara around 98% recyclable by weight.

The new design of armpad utilises materials that can be segregated easily and recycled more effectively. We have also used a revolutionary new base which unlike almost all other plastic bases is 100% recyclable. The unique design of the vertebra has enabled us to be economic with material, making it recyclable and easily reprocessed.
